June 30, 2010

What is cloud computing?

Cloud computing is a style of computing in which **dynamically scalable** and often **virtualized** resources are provided as a service over the Internet.

Cloud Characteristics

- Low upfront costs
 - ▣ Servers are not purchased, only rented (utility computing)
- Multi-tenant
 - ▣ Centralization of infrastructure geographically
 - ▣ High-levels of utilization and efficiency
- Scalable and Agile
 - ▣ On-demand provisioning of resources

Computing Power History

The Next Step

Computing Power as a Utility

1000+ Cores

Always available

Accessible in seconds

PiCloud Platform

- Python-integrated cloud computing platform

```
> import cloud
> from myfuncs import f1, f2, f3
>
```

PiCloud User

PiCloud

PiCloud Platform

- Python-integrated cloud computing platform

```
> import cloud
> from myfuncs import f1, f2, f3
> id1 = cloud.call(f1)
>
```

PiCloud User

PiCloud

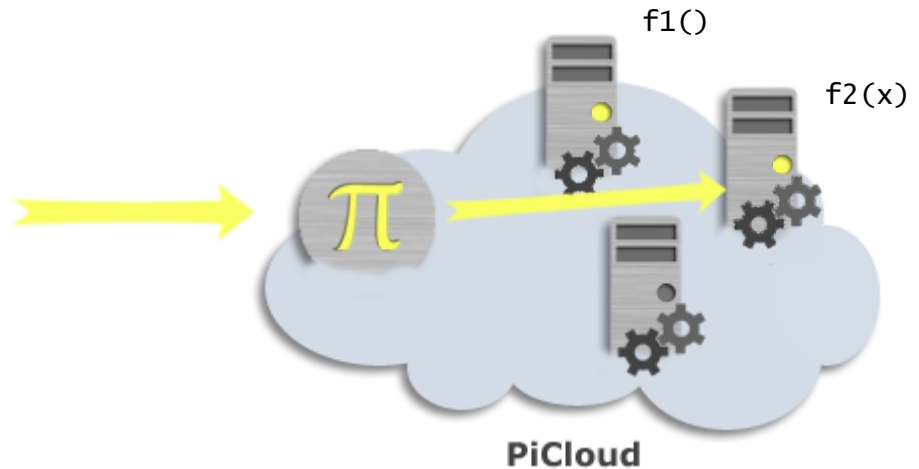

PiCloud Platform

- Python-integrated cloud computing platform

```
> import cloud  
> from myfuncs import f1, f2, f3  
> id1 = cloud.call(f1)  
> id2 = cloud.call(f2, x)
```

PiCloud in Action

- AutoTagger
 - ▣ Facebook photo-tagging assistant

- Basic Functionality
 - Detect and extract faces from a single photo
 - Repeatedly apply face detection to all photos in an album

Goals

□ Python-integrated cloud computing platform

Elastic

- Pay as you Use
- On-demand access to Massive Parallelization

Lock-in Free

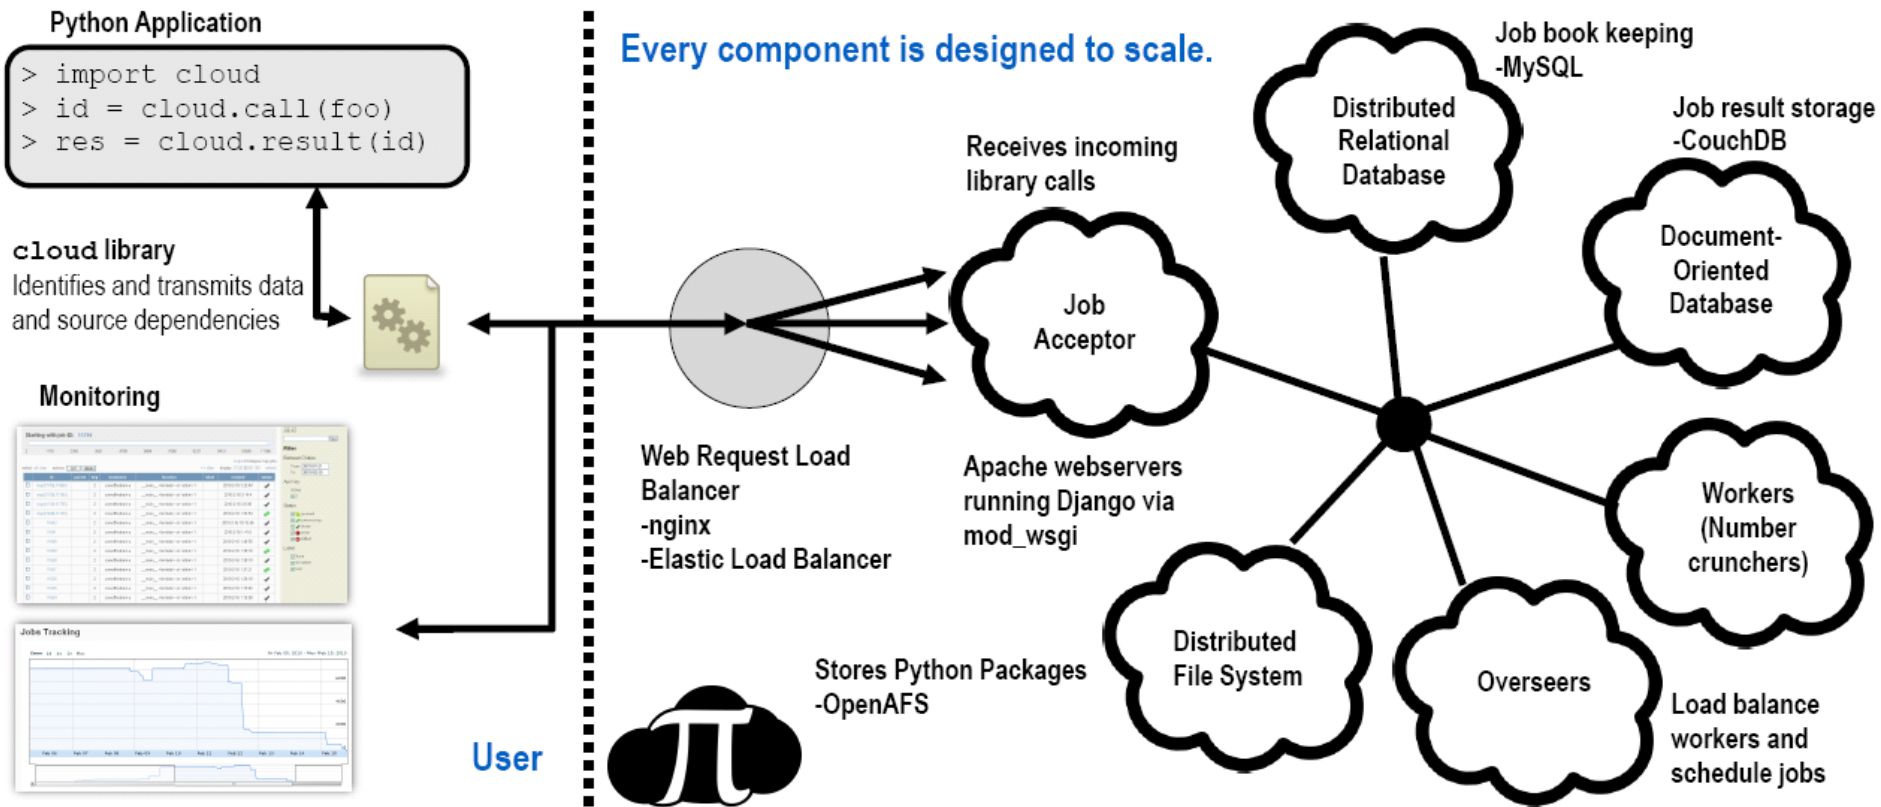

- Data can live anywhere and in any form

Easy to use

- Developer friendly; Minimal API
- You're already using the "language of the cloud"

Architecture

Scientific Computing

- We use the Enthought Python Distribution
 - Includes 75+ of the latest scientific packages
 - Numpy, Scipy
- PiCloud can accelerate all parallelizable computation
 - Protein Analysis
 - Cryptography
 - Astronomical and geological data analysis
 - Neural readings analysis

Conclusion

- “The cloud” is making computing resources available and accessible for all.
- Using the cloud doesn’t have to be difficult.
- PiCloud can help you!
 - ▣ Try us out at <http://www.picloud.com>
 - ▣ Stop by our table and say hi 😊
